

**Required materials for Chemistry 30A include:**

- ✓ Chapters 1-12 from McMurry's *Fundamentals of General, Organic and Biological Chemistry*, 6<sup>th</sup> Ed.
- ✓ Access code for Mastering Chemistry registration
- ✓ Lab Manual for Chemistry 30A at Foothill College
- ✓ Goggles for lab
- ✓ Calculator capable of logarithmic functions

**Textbook Options:**

1. Purchase a NEW customized version of the textbook from the Foothill College Bookstore. This custom version includes chapters 1-12 from the 6<sup>th</sup> edition of McMurry's *Fundamentals of General, Organic and Biological Chemistry*, full solutions to all chapter 1-12 book problems, and an access code to Mastering Chemistry, which includes a full ebook. Total cost for this textbook package is \$115.90. THIS IS WHAT I RECOMMEND!

2. Purchase a USED customized version of the textbook from the Foothill College Bookstore. NOTE: Used copies will NOT include the Mastering Chemistry access code! The access code must be purchased separately from Pearson for an ADDITIONAL \$56.30. (or \$103 if you also want the ebook). Purchase can be made from: [www.masteringchemistry.com](http://www.masteringchemistry.com). The used textbook will cost around \$39.95 from the bookstore. With the access code, the total cost will be \$96.25 with NO EBOOK.

3. Purchase a textbook from another source (Amazon, etc). Note that the textbook will most likely be the full text (chapters 1-29), and it probably will not include the solution manual. Also, it probably will not come with the Mastering Chemistry access code. If you purchase from another source, you will need to buy the Mastering Chemistry access code separately from Pearson for an ADDITIONAL \$56.30 (or \$103 if you also want the ebook). Purchase can be made from: [www.masteringchemistry.com](http://www.masteringchemistry.com). The total cost will vary depending on the textbook vendor.

4. Forego a textbook and purchase an ebook with your Mastering Chemistry access code from Pearson for \$103. Note that you will not have a solution manual if you choose this option. Purchase can be made from: [www.masteringchemistry.com](http://www.masteringchemistry.com)

Please note that there are textbooks on reserve for 2 hour use in the Foothill College Library Reserves Desk.
